

2MM

Motor Protector/Thermal Cut-Out

Introduction

Sensata Technologies builds the 2MM motor protector to meet almost any requirement of protection in a wide range of small motors, small transformers, solenoids, etc.. This compact motor protector is the best solution to protect the wide variety of motors used in industrial and domestic appliances against locked rotor and overload situations.

Design and Operating Principles

The motor protector 2MM consists of a metal housing that holds and protects the inner components against infiltration as well as mechanical deformation.

The can contains the calibrated Klixon® disc carrying a silver contact. The fixed contact is placed on the opposite side, separated from the terminal by an insulator. The 2MM is available in two versions: with epoxy insulation and with additional sleeve.

The operating principle of the 2MM is both simple and effective. A current flows through the resistive Klixon® bimetal disc. When a fault condition occurs, the increased current and ambient temperature make the bimetal disc snap open the contacts. The contacts close again automatically as the device cools down to a safe running temperature.

Applications

The 2MM operates as a sensitive safety cut-out for applications like:

· Small motors · Coils

· Solenoid valves · Transformers

In single phase motors it can be mounted directly in the main circuit to serve as on- or in-winding protector. It's compact size provides ease of installation, even in small spaces. At this time there is practically no small motor the 2MM cannot protect against overheating and overloading. Sensata Technologies 2MM provides you with a cost effective solution in terms of maximum quality and reliability.

Standard Operating Temperature Range	from 70°C - 160°C in 5K steps	
Tolerance on Open Temperature	± 10K (UL type ±5, ±7)	
Max. Ambient Temperature 175°C	175°C	
Differential	20K minimum	

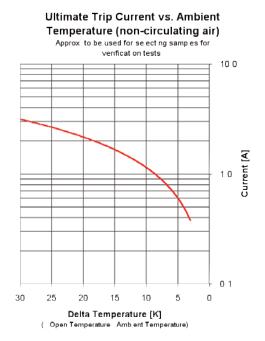

Declarations

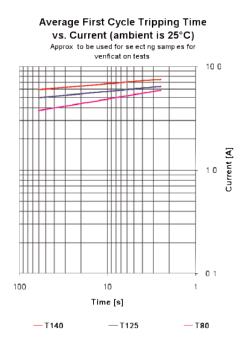

Declarations to EN60730-2-9		Declarations to EN60730-2-2 / EN60730-2-3	
Purpose of the Control	Thermal Cut-Out	Thermal Motorprotector / Thermal Ballast Protector	
Construction	Incorporated, non electric		
Degree of Protection	IP00		
Terminals for Ext. Conductors	For internal conductors only		
Temperature Limits of the Switchhead	175°C		
PTI of Insulation Materials	PTI 250	PTI 250	
Method of Mounting On-winding or by special means in the appliance		On-winding or by special means in the appliance	
Operating Time	For continuous operation		
Type of Action Type 2B		Type 3C / Type 2C	
Reset Characteristic Automatic		Automatic	
Extent of Sensing Element	Whole control		
Control Pollution Degree	Epoxy version: Degree 3 Naked version: Degree 1	Epoxy version: Degree 3 Naked version: Degree 1	

Maximum Contact Rating

7.0 (2.0) A 250 Vac (3.000 cycles)

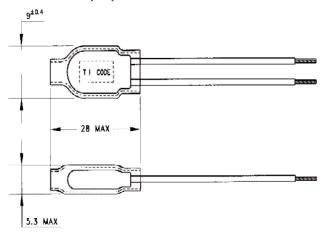

Curves

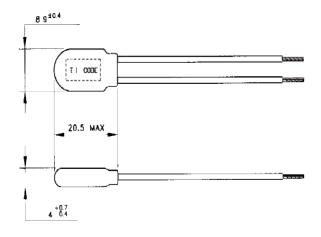

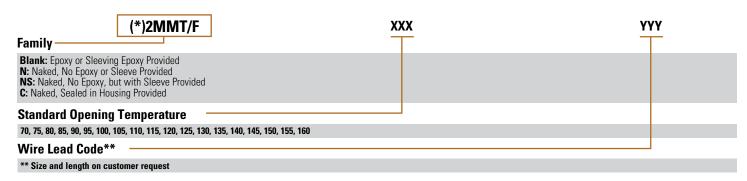

Dimensions in mm [Inch]

(*)2MMT: Open Temperature Tolerance \pm 7K, \pm 10K (*)2MMF: Open Temperature Tolerance \pm 5K

Available also: Doublet and Triplet types

AGENCY APPROVALS & CERTIFICATIONS

Agency	File Number	Standard	Note
